PROFESSIONAL SUMMARY
Dynamic and results-driven Software Engineer with 3+ years of experience designing scalable web architectures, microservices, and modern frontend interfaces. Proven expertise in Python, React, PostgreSQL, and cloud deployments with a focus on high throughput and clean system architecture.

WORK EXPERIENCE
Software Engineer | NextGen Cloud Tech | 2022 - Present
- Architected high-performance REST APIs with Python (FastAPI) and PostgreSQL, improving transaction latency by 42%.
- Spearheaded modular UI component development with React and TypeScript, supporting 65,000+ monthly active users.
- Automated continuous integration and deployment pipelines using Docker, GitHub Actions, and AWS ECS.
- Collaborated with product managers to deliver 8 sprint features ahead of deadline with zero production regressions.

Junior Software Developer | DataSphere Systems | 2021 - 2022
- Engineered backend services in Python and Flask connected to SQLite and Redis caching layers.
- Authored 120+ comprehensive unit and integration tests using PyTest, boosting code test coverage to 91%.
- Optimized complex SQL queries and index strategies, reducing database lock contention by 28%.

EDUCATION
Bachelor of Science in Computer Science
Institute of Technology | 2017 - 2021 | GPA: 3.85 / 4.0

TECHNICAL SKILLS
- Programming Languages: Python, JavaScript, TypeScript, SQL, Bash
- Frameworks & Libraries: React, FastAPI, Flask, Node.js, Express, Tailwind
- Databases: PostgreSQL, SQLite, Redis, MongoDB
- Cloud & DevOps: Docker, AWS, GitHub Actions, Linux, Git, Postman
- Core Practices: Data Structures, Algorithms, REST API, Microservices, Agile Scrum, Unit Testing

PROJECTS
- DevPulse (Collaborative Developer Analytics): Full-stack developer telemetry platform built with React, FastAPI, and Docker.
- StreamQuery (Distributed Data Processing): High-speed query execution engine using Python, SQLite, and WebSockets.
